

Future-Proof your Pharmacy Benefits Management Platform.

Specialized PBM technology consulting and engineering

With the Pharmacy Benefits Management (PBM) industry facing numerous headwinds it can be a challenge to keep up *and* meet customer experience expectations.

Praxent empowers PBM technology platforms to become industry leaders by modernizing their software. With our expertise in PBM workflows, we expand your team, simplify complex processes, enhance user experiences, and ensure compliance.

Let's transform your challenges into opportunities with future-proof strategies that deliver real value.

HOW WE CAN HELP

Scalable, Modular Platforms

Build or modernize software solutions that align perfectly with the specific needs of your PBM operations, now and in the future.

Rapid API-First Integrations

Ensure smooth, secure data flow within healthcare systems for a cohesive end-to-end customer experience.

Transparent and Compliant

Ensure full compliance with healthcare regulations and enhance data security to protect sensitive information.

Advanced Analytics

Employ cutting-edge analytics to transform data into actionable insights, optimizing decision-making processes.

Elevated User Experiences

Transform complex PBM workflows into modern, intuitive, user-friendly interfaces that drive market adoption and satisfaction.

Streamlined, Customizable Operations

Automate repetitive tasks, reduce manual errors, and enable tailored configurations to meet the unique needs of each client and plan efficiently.

Competitive Advantage:

Differentiate your platform with superior user experiences, advanced features, flexibility that scales, and a reputation for innovation.

Enhanced Client Satisfaction:

Empower your PBM clients to deliver better care, improve outcomes, and control costs.

Regulatory Compliance:

Ensure your platform meets all relevant regulations and security standards, protecting sensitive patient data.

Reduced Operational Costs:

Streamline processes, automate tasks, and optimize workflows to reduce operational expenses. Scale cloud storage flexibly.

Data Security:

Protect sensitive data, prevent bad actors, and secure your cyber environment.

Extend your team, *flexibly*.

Frontend, Backend, Cloud, DevOps, QA, UX Design, Program Management. You name it, we have it. Whether you need us for a scoped out project or to fill a short-term skill or capacity gap, we're here to help.

About Praxent.

For over two decades, Praxent has been helping clients in financial services and insurance command their future by accelerating their transformation into modern digital experiences backed by agile enterprise systems that win customers now and in the future.
